JAKMAX

PRECISION PARTS

The mower blade that is a **CUT** above!

Xtreme Hardness & Toughness

It's the XHT (Xtreme Hardness and Toughness).

The XHT is one of the toughest, hardest, safest, long-lasting and most impact-tough mower blade on the market. We can make this claim with confidence because of our patented manufacturing process, a process that includes rigorous testing by highly skilled metallurgical engineers.

What makes XHT the best mower blade available today?

→ XHT Blades unique heat treating process - increases blade strength, and enables the blade to hold its edge longer.
→ Engineering expertise - our metallurgical engineers have over 125 years of collective experience, nine U.S. Patents, and state-of-the-art testing facilities.

XHT technology.

Predator blades are 20% - 40% harder than standard blades so Predators stay sharper longer.

New airflow tooth design.

Increases blade strength while producing more airflow for smaller clippings and better mulching.

New airflow tooth design.

Increases blade strength while producing more airflow for smaller clippings and better mulching.

Flat blade design.

Increases blade strength while producing more airflow for smaller clippings and better mulching.

Mulching hump design.

The hump increases the Predators mulching capabilities.

Extended cutting length.

Increases cutting efficiency.

JAK MAX PROCORE Professional Nylon Line

The next generation in professional nylon line technology

When quality is important and you want value for money, you have only one clear choice **insist on JAK Max ProCore nylon line.**

JAK Max Pro-Round Core and Pro-Diamond Core range of nylon line is a revolutionary new cutting monofilament combining two materials with specific technical characteristics, a unique and tough inner core minimising breakage, covered with a skin highly resistant to notches and wear and tear. The combined materials optimise the strength and efficiency of the nylon line. The durability of JAK Max nylon line has been proved in field tests as 30% longer lasting than traditional professional nylon lines. Made by Speed France - recognised as the World's leading manufacturer of nylon line, supplying market leading OEM's world wide.

→ **Advanced monofilament technology for extreme durability & cutting performance**

→ **100% virgin raw materials and no compromises on batch quality.**

JAK PRO-CORE professional nylon line range is available in both
